

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

"DAWSON'S BIRDS OF OHIO."

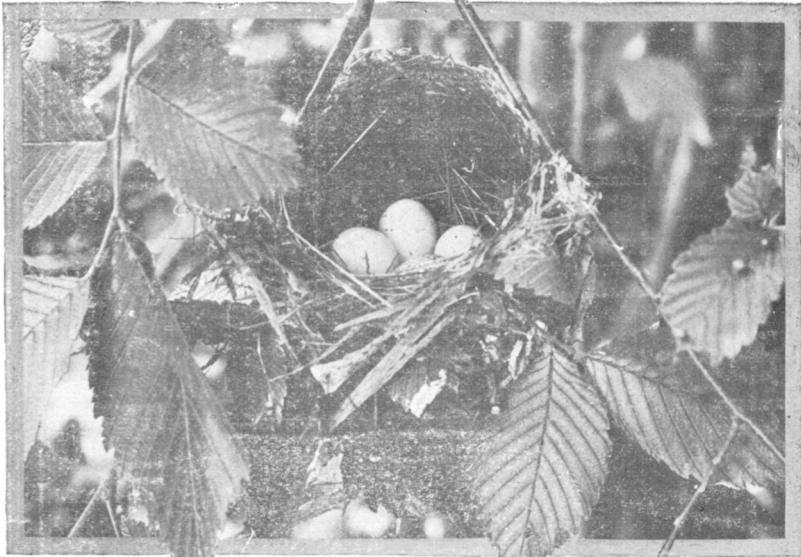

A NEW DEPARTURE IN BIRD BOOKS.

SCIENTIFIC!

A happy combination of ACCURATE DESCRIPTION of plumages with OF LIFE HISTORIES. The bird and one's own observations the popular part of the text. combines these features. The Dawson, who combines a col- with a life spent in the study of the country and eleven years closet student, in sympathy

POPULAR!

interestingly written SKETCHES may be certainly determined, may then be corroborated in This is the ONLY BOOK which text is written by W. Leon lege and university education living birds in many parts of in Ohio. He is both field and with the living birds, but recog-

nizing the ne-
cessity of ac-
curate identifi-
cation.

The introduction and analytical keys are prepared by Lynds Jones, who has a wide reputation as a careful ornithologist.

Fully illustrated by

80 PLATES IN COLORS,

selected from the choicest of the color-photographs, representing the acme of perfection in color-photography, and

200 ORIGINAL HALF-TONES

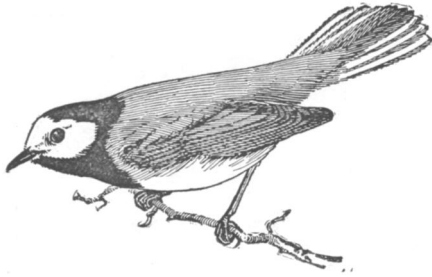

from photographs taken in Ohio, showing the wild birds, their homes, and their haunts.

The book contains **720 pages** exclusive of the color plates, making a sumptuous volume, the **best of its class**, yet within the reach of all. No library will be complete without it.

Specimen pages on application to

THE WILSON BULLETIN, Oberlin, Ohio.

The Warblers in Color.

Bird-Lore begins in its December issue, the publication of a series of beautifully colored plates, accurately representing all the plumages of North American Warblers.

This number, with a Christmas card of a before unpublished view of John Burroughs' cabin, "Slabsides," will be sent free to all subscribers to Vol. VI, 1904, of this magazine. Or, on receipt of one dollar, we will send the magazine and the card inscribed with your name as donor of Bird-Lore for 1904, in time to be received as a

CHRISTMAS PRESENT.

20 Cents a Number.

Birds of Wayne County, Ohio, Oberholser, 25 cents.

Address LYND'S JONES, Oberlin, Ohio.

BIRD GLASSES

Are you supplied with something that will enable you to study the habits of birds while far enough from them to permit them to act naturally? If not, you have missed a great deal of the real pleasure of bird study. The best always costs more, but it is worth more and serves you better in proportion to its value. Before buying a bird glass you should investigate the merits of the PRISM glasses, which combine power and clearness of field with large field, compactness, strength, and lightness. Professional bird students use them and will have no other. A card with your name and address will bring you a descriptive booklet of the most usable style of prism glasses.
